

**2. FIBER OPTICS****UNIT: 19****Author: Prof. A. K. Ghatak**

| <b>S. No.</b> | <b>Title</b>  | <b>CD No.</b> |
|---------------|---|---------------|
| 1.            | Some Recent Trends in Fiber Optics                            | 1133          |
| 2.            | Light Guidance Through an Optical Fiber                       | 1134          |
| 3.            | One Dimensional Ray Equation                                  | 1135          |
| 4.            | Ray Paths in Optical Fibers                                   | 1136          |
| 5.            | Pulse Dispersion  | 1137          |
| 6.            | Modes in Optical Wave Guides : Maxwell's Equations            | 1138          |
| 7.            | Concept of Modes  | 1139          |
| 8.            | Modes in a step index fiber                                   | 1140          |
| 9.            | Modes in a step index fiber (Contd.)                          | 1141          |
| 10.           | Propagation Characteristics of a Step index Fiber- I          | 1142          |
| 11.           | Propagation Characteristics of a Step index Optical Fiber- II | 1143          |
| 12.           | Wave Guide Dispersion   | 1144          |
| 13.           | The Petermann - 2 Spot Size                                   | 1145          |
| 14.           | Beam Propagation in a Parabolic Index Wave Guide              | 1146          |
| 15.           | Parabolic Index Wave Guide (Contd.)                           | 1147          |
| 16.           | Optical Solitons  | 1148          |
| 17.           | Non Linear Schrodinger Equation                               | 1149          |
| 18.           | Optical Fiber Fabrication                                     | 1150          |
| 19.           | Fiber Fabrication Techniques (Contd.)                         | 1151          |
| 20.           | Fiber Fabrication (Contd.)                                    |               |
