2. SIGNAL & SYSTEMS   UNIT: 42
Author: Prof. S.C. Dutta Roy

S. No.	Title	CD No.
1.	Introduction to the Course and Basic Concepts	44
2.	Signals & their Transportation	45
3.	Elementary Signals in the Discrete Time Domain	46
4.	Characterisation of Signals	47
5.	Basic concepts of Linear Time Systems	48
6.	Convolution Invertibility, & Stability Causality	49
7.	Stability Unit, Step response and Differential Equation	50
8.	Systems Described by differential & Difference Equations	51
9.	Fourier and His Series	52
10.	More About Fourier Series (With Uncomfortable Questions)	53
11.	Those uncomfortable Questions about the Existence of Fourier & series and some More	54
12.	Introduction to Fourier Transform	55
13.	Fourier Transform of Periodic Function & Fourier Transform Properties	56
14.	More Properties of Fourier Transformation	57
15.	Anatomy of a Class Test & a Continued Iook at the Properties of F.T.	58
16.	Modulation Convolutions & Other Interesting Properties of F.T.	59
17.	A Deeper Look at the Modulation Property of F .T.	60
18.	Fourier Analysis of Discrete Titne Signals & Systems -The Beginning	61
19.	More About Fourier Transform of Discrete Time Signals	62
20.	Further Look into the Properties of DTFT	63
21.	Convolution, Modulation & Other Properties of DTFT	64
22.	Farewell to Discrete Time Fourier Transform & Introduction to sampling	65
23.	More about Sampling	66
24.	Introduction to Laplace Transform	67
25.	Region of convergence of Laplace Transform &-Properties of Laplace Transform	68
26.	Properties of Laplace Transform (contd.)	69
27.	Concluding Discussion on Laplace Transform	70
28.	Introduction to Z Transform	71
29.	Properties of Z Transforms	72
30.	Further Discussion on Properties of Z Transform	73
31.	Solutions to Class Test - 2, Concluding Discussion on Z Transform	74
32.	Introduction to Random Signals & Probability	75
33.	Probability Functions	76
34.	Solution to Minor Z Problems & More about PDF & pdf	77
35.	More about PDFS & Pdfs	78
36.	Classification of Random Processes & Introduction to Correlation Functions	79
37.	More About Correction Functions	80
38.	Cross Correlation Function and their Properties	81
39.	Introduction to Spectral Density	82
40	More about Spectral Density	83
41.	Response of Linear System to Random Inputs	84
42.	Frequency Domain Analysis of LT1 Systems Excited by Random Inputs	85
